WORK PROGRESS REPORT

Topic

Library Management System

PART 1 — STUDENT INFORMATION

Item	Information
Student ID	22120118
Full Name	Vong Sau Hung
Class	CQ2024-7
Course	Java Application Programming
Lecturer	MSc Nguyen Van Khiet
AI Usage Rate (%)	30%

PART 2 — AI USAGE DECLARATION (Form B)

2.1 AI Tools Used

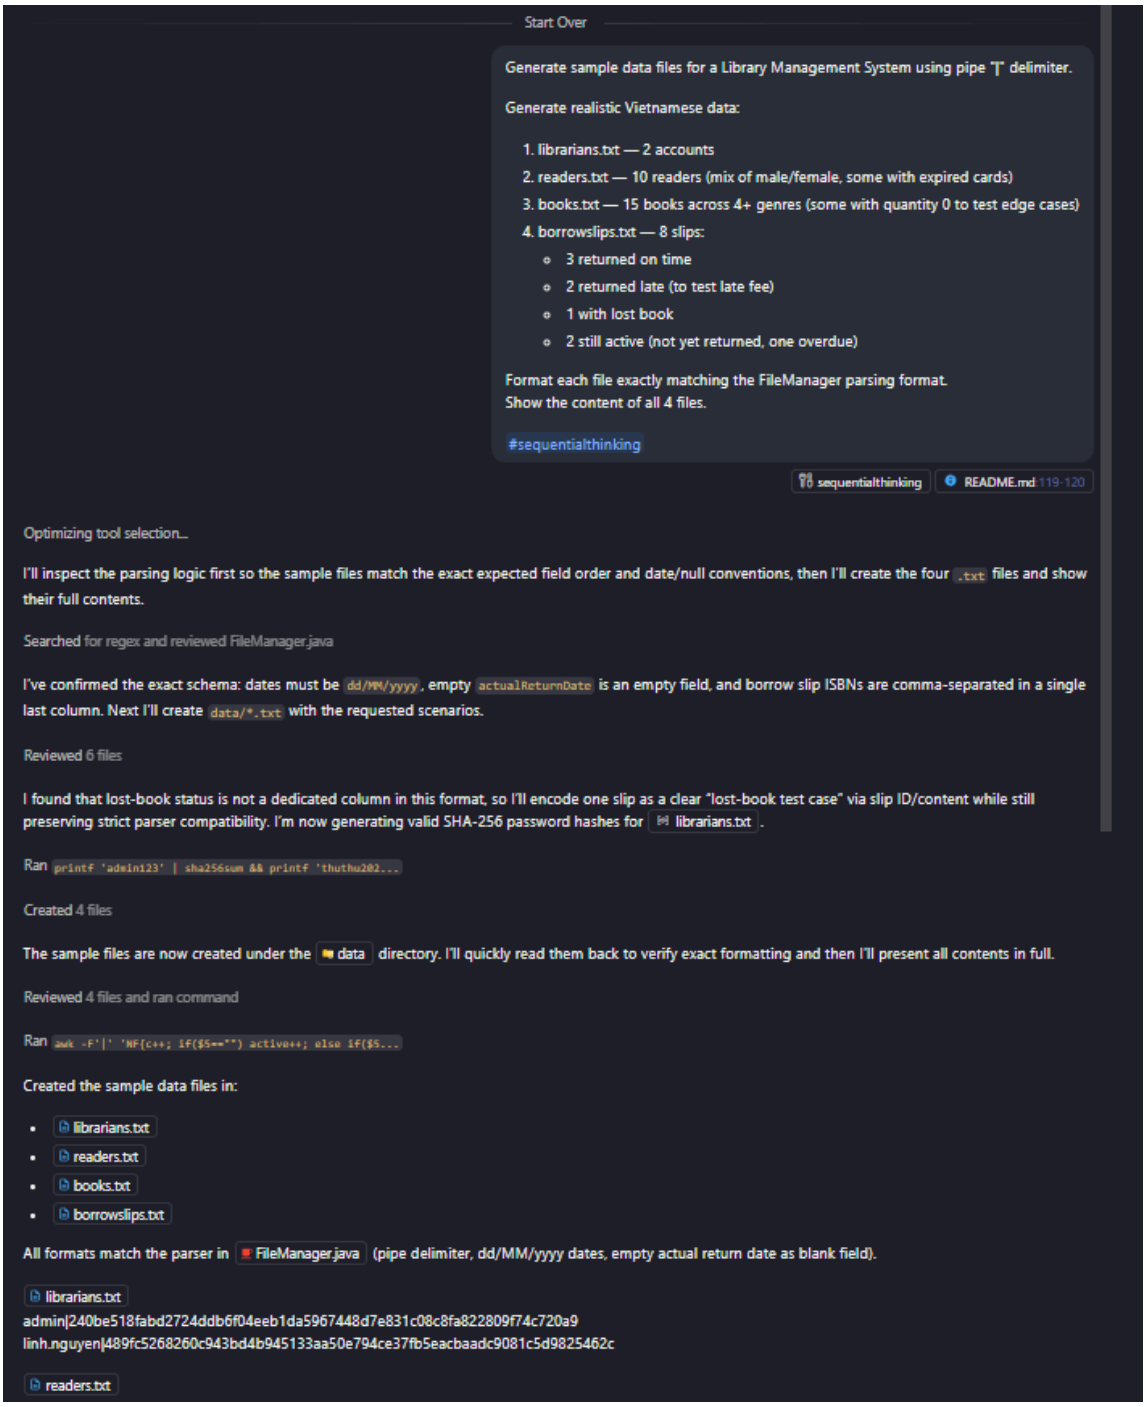
AI tool, version, and platform	Access time (date, hour)	Prompt used	Purpose of use	AI-generated content	Student's own work / edits / validation
GitHub Copilot (GPT-5.3-Codex), integrated in Visual Studio Code	16/04/2026, 20:10	Generate sample data files for a Library Management System using pipe "|" delimiter.	Generated sample datasets for the library system data files	Generated sample content for `librarians.txt`, `readers.txt`, `books.txt`, `borrowslips.txt` in `|`-delimited format	Reviewed all generated data, corrected date values, checked consistency across readers, books, and borrow/return scenarios
GitHub Copilot (GPT-5.3-Codex), integrated in Visual Studio Code			Accelerated repeated code patterns using code suggestions	Suggested code skeletons for model/service/UI (attributes, getters/setters, constructors, panel skeletons, basic handlers)	Reviewed all suggested code, adjusted business logic, refactored where needed, and manually tested before commit

2.2 AI Citation

- Copilot. GPT-5.3-Codex, GitHub via Visual Studio Code, accessed 20:10 on April 17, 2026, prompt: "Generate sample data files for a Library Management System using pipe "|" delimiter.", used to create sample datasets for the library system; AI generated draft records for `librarians.txt`, `readers.txt`, `books.txt`, `borrowslips.txt`; student reviewed, corrected date values, and validated scenario consistency.

2.3 Required Evidence Checklist (attached appendix)

Appendix: prompt history evidence for sample data generation:



The sample files are now created under the `data` directory. I'll quickly read them back to verify exact formatting and then I'll present all contents in full.

Reviewed 4 files and ran command

Ran `awk -F'|' 'NF{c++; if($5=="") active++; else if($5...`

Created the sample data files in:

- `librarians.txt`
- `readers.txt`
- `books.txt`
- `borrowslips.txt`

All formats match the parser in `FileManager.java` (pipe delimiter, dd/MM/yyyy dates, empty actual return date as blank field).

`librarians.txt`

```

PART 3 — FEATURE EVALUATION TABLE

No.	Feature	Completion Status	Notes	Git Commits

1	Create librarian account.			Commits on Apr 7, 2026 Merge pull request #2 from Shungisme/feature/auth — Shungisme committed last week — 2e8bef feat: add librarian registration, login, and logout functionality — Shungisme committed last week — a00e8bc
2	Login, logout.			Commits on Apr 7, 2026 Merge pull request #2 from Shungisme/feature/auth — Shungisme committed last week — 2e8bef feat: add librarian registration, login, and logout functionality — Shungisme committed last week — a00e8bc
3	Reader management. 1. View reader list in the library 1. Add a reader 1. Edit reader information 1. Delete reader information 1. Search reader by ID card/CCCD 1. Search reader by full name			Merge pull request #3 from Shungisme/feat/reader-management — Shungisme committed last week — d8f6e7 feat: add search by ID card and search by name — Shungisme committed last week — a5dfc3 feat: implement reader list, add, edit, and delete functionality — Shungisme committed last week — c6c9c86
4	Book management 1. View all books in the library 1. Add a book 1. Edit book information 1. Delete a book 1. Search book by ISBN 1. Search book by title			Merge pull request #4 from Shungisme/feature/book-management — Shungisme committed last week — 647cc98 feat: add search by ISBN and search by title — Shungisme committed last week — 2c98d60 feat: implement book list, add, edit, and delete functionality — Shungisme committed last week — 3c0cdaf
5	Create borrow slip			Merge pull request #5 from Shungisme/feature/borrow-slip — Shungisme committed last week — 634dddf feat: implement borrow slip creation with validation and quantity update — Shungisme committed last week — a2280e7
6	Create return slip			Merge pull request #6 from Shungisme/feature/return-slip — Shungisme committed last week — 497184c feat: implement return slip with late fee and lost book penalty calculation — Shungisme committed last week — b41d623
7	Basic statistics 1. Total number of books in library 1. Number of books by genre 1. Total number			Merge pull request #7 from Shungisme/feature/statistics — Shungisme committed last week — 7a56a6 feat: implement all 6 statistics views with refresh functionality — Shungisme committed last week — 029157a

	of readers 1. Number of readers by gender 1. Number of currently borrowed books 1. List of overdue readers
